Opening hours

Access Library

Can

- With valid Students ID, if not, please deposit personal ID and register access at library entrance.
- You are responsible for your belongings at all times.
- Ask others to end conversations, lower their voices, and otherwise maintain an atmosphere that is supportive of scholarship.

Can Not

- Food and drinks are not allowed in all areas of library.
- Help non-NCKU students bring their personal reading materials into the library.

Lockers locates on the 1F, Main library

Using the Library

Borrowing

Number of Checkouts Allowed:
Undergraduates: 30
Graduate Students: 50

Book Loan Period: 30 days
Renewal: 11*

The following items can not be renewed:
Items on hold/recalled,
an overdue recalled item

Overdue Fines: NTD$ 5 per item per day

No “grace periods” for overdue materials.
Frequency check your email reminder.

Placing a hold

Maximum of reserved items: 10

Understand Citation and bibliography list

A bibliography is a list of works on a subject or by an author that were used or consulted to write a research paper, book or article. It can also be referred to as a list of works cited. It is usually found at the end of a book, article or research paper.

- **Book & Journal Article：**

Author name
Title of publication
Article title (if using a journal)
Date of publication
Place of publication
Publisher
Volume number of a journal, magazine or encyclopedia
Page number(s)

- **Theses & Conference proceedings**

Author name
Title
Date of Publication
Degree
Name of University/Conference

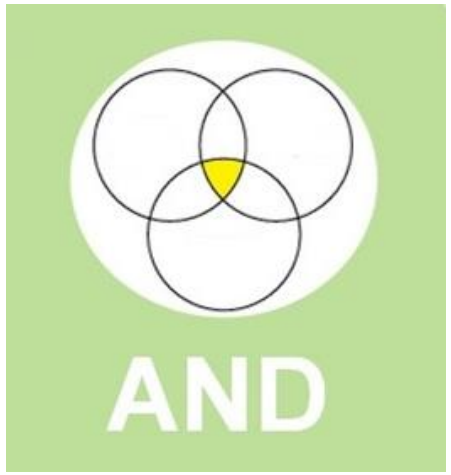
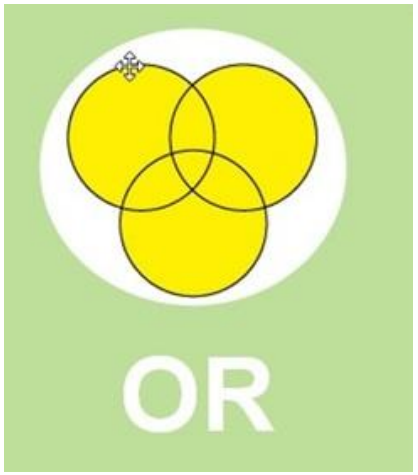
Keyword search with Boolean operator

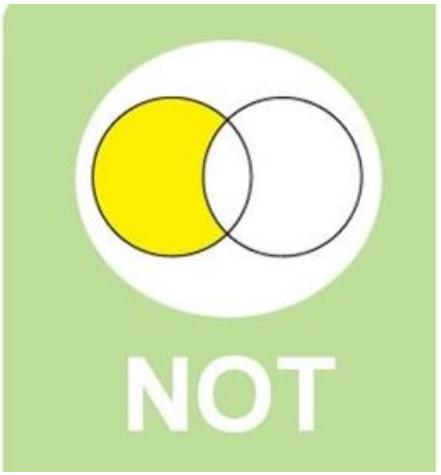
Basic search skills

Boolean searching allows you to combine keywords using AND, OR, and NOT (e.g., society and literature or fiction).

AND	OR	NOT
Each result contains all search terms.	Each result contains at least one search term.	Results do not contain the specified terms.
The search heart and lung finds items that contain both heart and lung.	The search heart or lung finds items that contain either heart or items that contain lung.	The search heart not lung finds items that contain heart but do not contain lung.







Use Truncation and Phrasing

Truncation

Use truncation to find variant endings

If you enter a search for…	
electro*	electron, electrons, electronics, electromechanical…
*optic	optic, fiber-optic, electrooptic…
me*n	men, mean, median…

Phrasing

Search for phrases by using brackets or quotation marks,
"Internet of things" = Search "Internet of things"
Internet of things = Search "Internet" & "things"

Stop Words

a	as	have	of
about	at	how	on
above	can	I	or
an	do	in	over

and more…

Select Keywords

Basic search skills

Keywords

1. Identifying the main concepts of your topic
2. Brainstorming synonyms and antonyms that could also be used to describe your topic
3. Spell out abbreviations

Synonyms & antonyms

Synonyms ： words that have the same or similar meaning.
Antonyms ： words that have the opposite meaning.

https://www.thesaurus.com/
https://www.merriam-webster.com/

Abbreviations

Abbreviation	Complete Phrase
ESL	English as a Second Language
EFL	English as a Foreign Language
SWOT	Strengths, Weaknesses, Opportunities, and Threats
OCD	Obsessive Compulsive Disorder
ADHD	Attention-Deficit/Hyperactivity Disorder

e.g. CRS could be Cytoreductive surgery, Common reflection surface OR Common Reporting Standard.

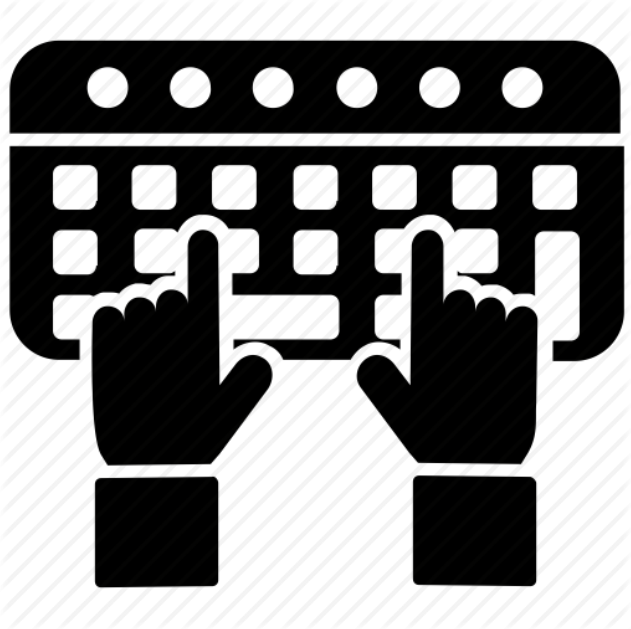
Practice 6



1. Find at least 3 theses by your department/institute/research fields, graduated/published from 2010-2019, via：
   ① National Digital Library of Theses and Dissertations in Taiwan
   ② Digital Dissertation Consortium
   ③ ProQuest Dissertations and Theses(PQDT)

2. Try searching following Internet resources：
   ① Networked Digital Library of Theses and Dissertations (NDLTD) Union Catalog
   ② Open Access Theses and Dissertations (OATD)
   ③ British Library e-theses online service (EThOS)
   ④ DART-Europe E-theses Portal

Academic search engines

Google Scholar & Microsoft Academic Search

Google Scholar

☑Advantages：

1. Google Scholar is familiar and relatively simple to use, much like Google.
2. Google Scholar allows users to search for a find a wide variety of materials including articles, books, “grey literature” like conference proceedings on a vast number of topics.
3. Google Scholar allows for you to see articles related to the one that might interest you, how many times an article has been cited and by whom, and provides citations for articles in a number of styles.
4. Google Scholar can display links to articles and books held through NCKU Libraries. For more information, see Using Google Scholar from Home tab.
5. Google Scholar allows you to save both citations and articles to read later.

☒Disadvantages：

1. Google Scholar's coverage is wide-ranging but not comprehensive. It can be a research source, but should not be the only source you use.
2. Google Scholar does not provide the criteria for what makes its results "scholarly". Results are often vary in quality and it is up to the researcher to determine which of the results are suitable for their purposes.
3. Google Scholar does not allow users to limit results to either peer reviewed or full text materials or by discipline.
4. Google Scholar does not provide notice of when its materials are updated.
5. Google Scholar's citation tracker can be difficult to use and inaccurate.

Unleash the Power of Semantic Search

Microsoft Academic understands the meaning of words, it doesn't just match keywords to content. For example, when you type "Microsoft," it knows you mean the institution, and shows you papers authored by researchers affiliated with Microsoft. Similarly, Microsoft Academic knows journal titles, conference names, and many research topics. Try these queries to understand the power of semantic search and unleash it yourself!

Feedback

Microsoft Academic search

Where does the data for Microsoft Academic come from?

MA uses machine readers powered by artificial intelligence (AI) to scan and extract knowledge from all scholarly publications discovered and indexed by Bing. Bing indexes data from a variety of sources ranging from publisher sites to individual authors' personal homepages. MA's AI agent then cleans and organizes these data into a graph database we call the Microsoft Academic Graph (MAG).

Showing semantic results matching "*machine learning*" 1-10 of 5000+ (0.258 seconds)
